SKATES

RISPORT
SKATES

Company

Risport was founded in the 1970s in Montebelluna, the home of the Sportsystem. It immediately established itself as the leading brand in the world of skating due to its characteristic elegance, performance and capacity for innovation.

A history of excellence

Risport was founded in the 1970s in Montebelluna, the home of the Sportsystem. It immediately established itself as the leading brand in the world of skating due to its characteristic elegance, performance and capacity for innovation.

The world's best skaters wear Risport to compete in all the highest level competitions, obtaining excellent results.

Since 1995, Risport has been part of the Rossignol Group, a world leader in winter sports. From its headquarters in Montebelluna, Risport continues to be the go-to brand for high-level skaters and all those who want to compete, with its world-class products born from cutting-edge technological research without betraying over 50 years of style.

At the heart of Rossignol Group's Mission

For many years, we have been seeking and applying solutions to the challenge facing today's world: how to balance the economic aspects to support our businesses and employees while simultaneously minimising our environmental impact to help build a sustainable future. Our approach is undoubtedly incomplete and imperfect, but we are working constantly and as quickly as possible to achieve economically effective, socially fair and environmentally sustainable development through a process involving all our brands and all the production sites of our group.

Producing our products while respecting the environment in terms of both the materials and production processes adopted.

Helping to protect the local area and the communities that keep it alive.

The Respect programme

The Rossignol group is taking environmental challenges to heart and is committed to taking concrete actions to protect its playing field.

To this end, we are committed to achieving the following objectives:

1. Reduce our carbon footprint by 30% by 2030 and aim to be carbon neutral by 2050.

2. Reduce our waste by 40% by 2025

3. Take action to continuously improve the working conditions and quality of life of our employees and partners.

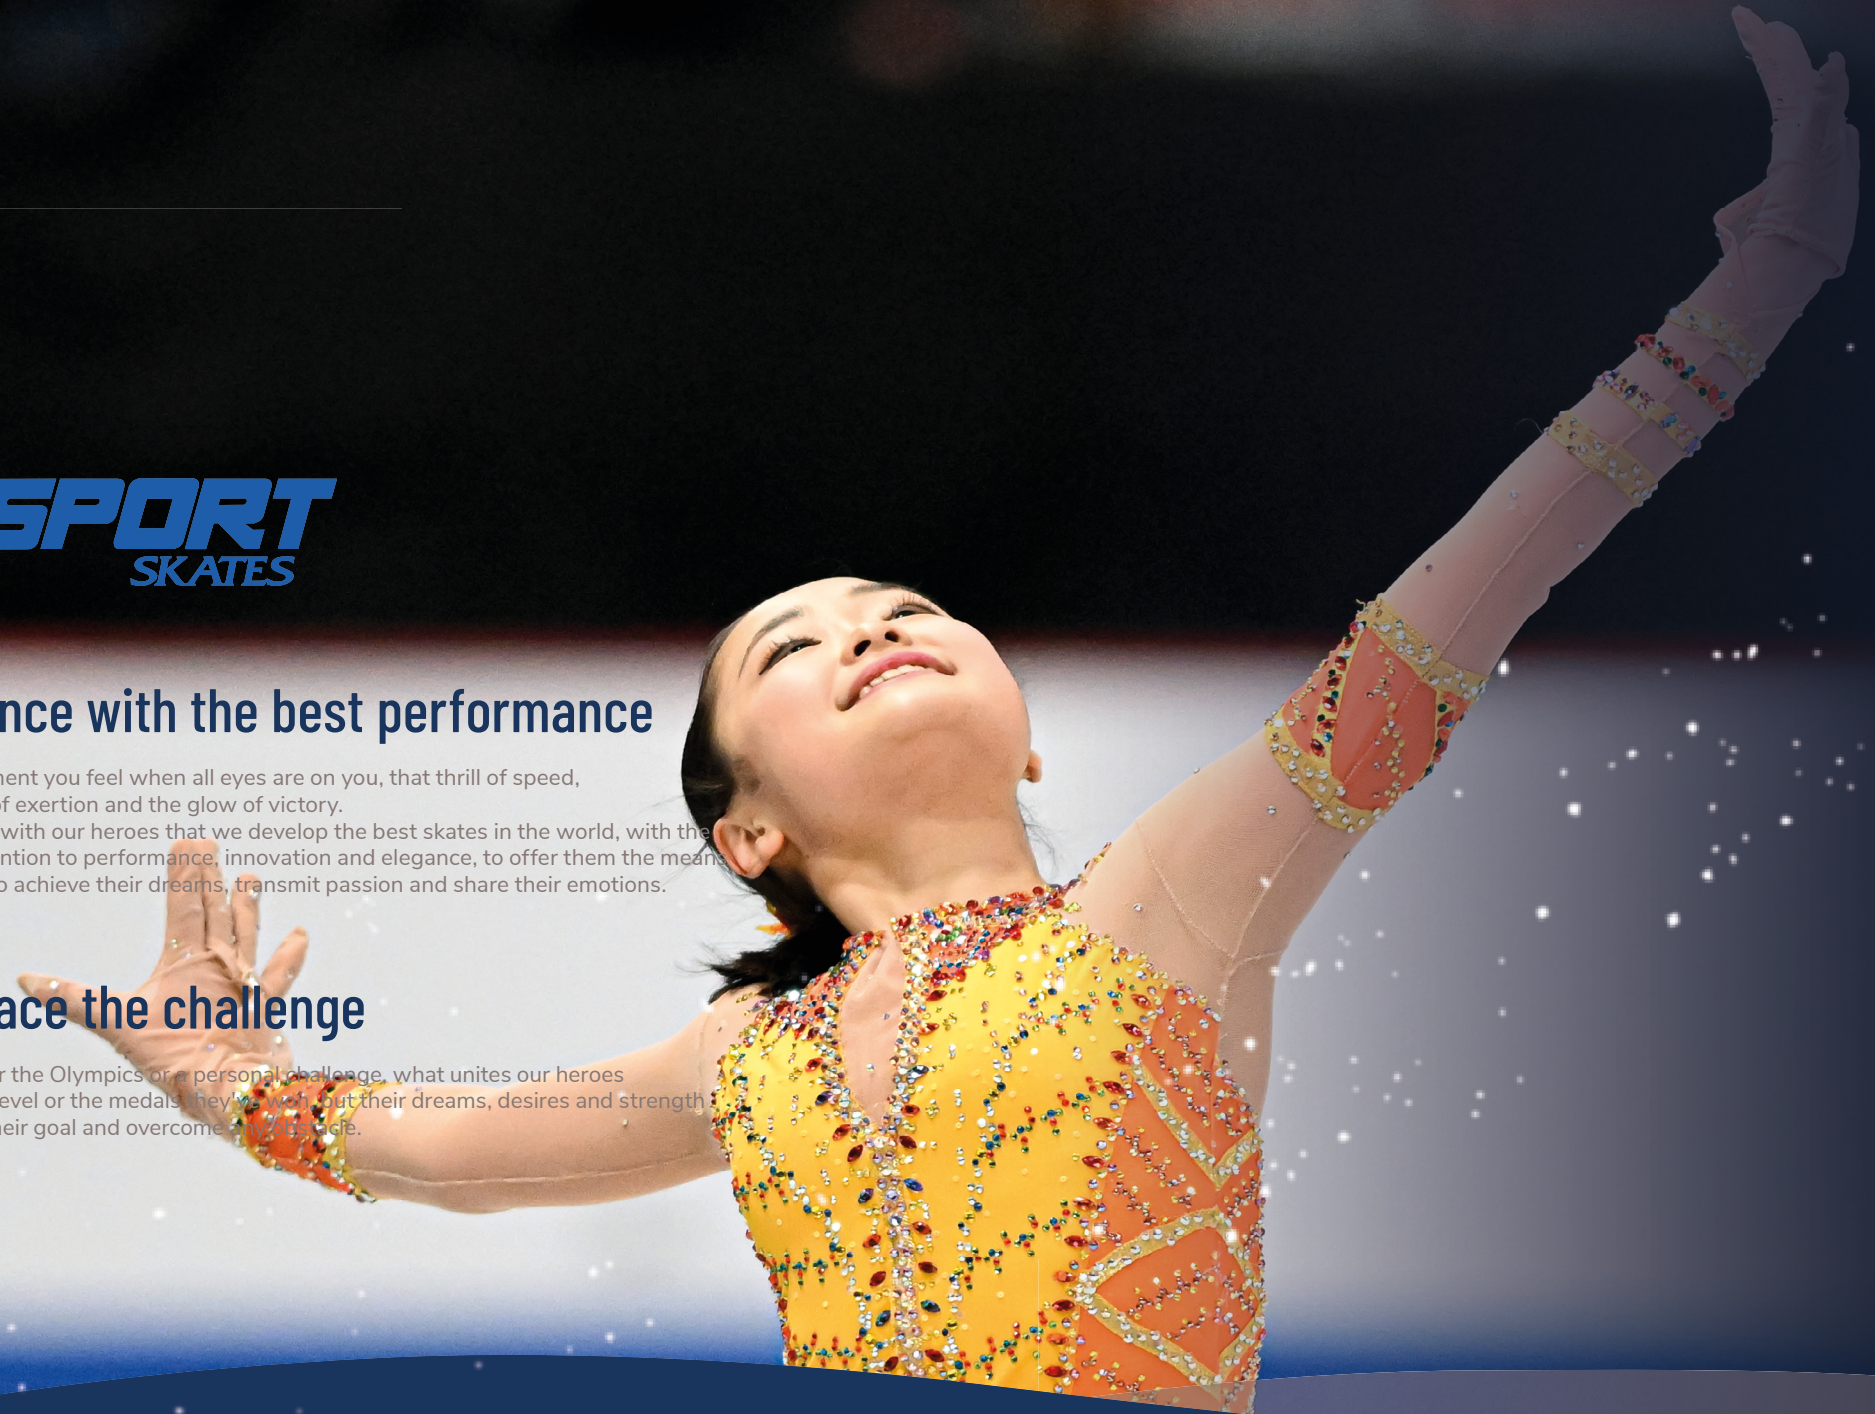

Elegance with the best performance

The excitement you feel when all eyes are on you, that thrill of speed, that flame of exertion and the glow of victory.

It is for and with our heroes that we develop the best skates in the world, with the utmost attention to performance, innovation and elegance, to offer them the means they need to achieve their dreams, transmit passion and share their emotions.

Embrace the challenge

Whether for the Olympics or a personal challenge, what unites our heroes is not their level or the medals they win, but their dreams, desires and strength to pursue their goal and overcome any obstacle.

Elevate your performance

Perfecting their movements and technique day after day to make every element elegant and harmonious. Risport has been at its athletes' side, studying the best skates for over 50 years, because the athlete is our starting point.

Perfect balance between heritage and innovation

Our heritage is the custodian of our values. For us, respect for tradition means withstanding time and not being subject to passing trends. Years of experience in this sector with the highest level champions have helped us channel our heritage to face the challenges and changes needed to keep innovating in line with tradition. This is why we strongly believe that the key to facing the challenges of the future is the perfect balance between innovation and heritage.

Project Prime

Prime's innovation

The Prime models introduces three major innovations in the skating scene, aimed at ensuring maximum performance, comfort and durability.

1. Comfort

Thanks to an exceptional padding in the ankle part.

SPECIAL ANKLE PADDINGS

The anatomy of the ankle is supported by a new padding structure of the cuff with a special insert made in **PORON**, designed to ensure complete comfort and support.

2. Durability

Achieved with a special treatment called stabilization.

SPECIAL PRODUCTION PROCESS

This special production process called "stabilization" guarantees durability and stability of materials.

3. Performance

Due to the innovative construction and materials on the tongue.

INNOVATIVE TONGUE

After several studies and tests we designed the tongue with an innovative construction. Thanks to this we achieved two important goals:

- to prevent pressure point on the muscles and tendons of foot and ankle;
- give and elastic return.

This result was achieved by renewing the padding and adding a 3D EVA-PU insert designed to anatomically wrap the instep and promote flexion in the correct place.

Royal Prime

NEW

FREESTYLE/
PAIRS

FIGURES

Royal Prime is the brand new model from Risport and the answer to all high-level athletes' needs, to guarantee them the best performance (quadruple and triple jumps). Made with light materials and a high technological content (microfibre) that make it the lightest skate on the market today, it proudly reflects the aesthetic lines of the Royal model that has graced the winners' podiums at the World Championships and the Olympics.

The Royal Prime model introduces two major innovations in the skating scene, both aimed at ensuring maximum performance:

- Special processing (crystallisation) that guarantees the stability of the materials and durability over time
- A special EVA insert that gives the tongue extreme flexibility, elasticity and maximum rebound

It implements the features of Risport professional products, including:

- The exceptional lining that guarantees maximum stability and control of the skate, with antibacterial and anti-inflammatory properties thanks to treatment with aloe
- Leather sole with special angled processing that enables skaters to reach very high lateral inclinations; leather has the ability to stop vibrations being transmitted to the foot and simultaneously to ensure perfect control
- Maximum comfort thanks to the anatomical profile, the ultra-padded collar and the possibility of achieving perfect customisation via thermoforming
- The special lacing system, made with reinforced eyelets, holes and hooks, allows multi-adjustable lacing at different points of the foot and ankle
- Maximum support thanks to lateral reinforcements (90)
- Innovative collar design that allows maximum extension following the foot's natural movement

COACH

Faithful to the Risport tradition with its iconic leather sole, this model designed for young professionals (triple and double jumps) combines design, comfort, performance and elegance while ensuring extraordinary lightness.

This skate features:

- A brand new lining of the highest quality and technical value that acts as a cushion in the areas most subject to stress, like the ankles, without neglecting breathability, which is important for maintaining the right foot temperature and preventing bacteria from forming
- Leather sole with special angled processing that enables skaters to reach very high lateral inclinations; leather has the ability to stop vibrations being transmitted to the foot and simultaneously to ensure perfect control
- Maximum comfort thanks to the anatomical profile, the ultra-padded collar and the possibility of achieving perfect customisation via thermoforming
- The special lacing system, made with reinforced eyelets, holes and hooks, allows multi-adjustable lacing at different points of the foot and ankle
- Excellent support thanks to lateral reinforcements (65)

FIGURES

Mercurio is the top of the range of the roller line created specifically for professional skaters and high-level athletes (triple and double jumps), featuring an innovative design and technical solutions aimed at combining performance and lightness. Thanks to the combination of the exclusive Pro Mount sole with Air Flow System and research into innovative materials, it offers maximum performance, lightness, breathability and comfort.

Its strengths are:

- Pro Mount sole with Air System featuring an extremely innovative design, made of thermoplastic material that guarantees high performance by reducing weight and vibrations; the exclusive "Pro Mount" technology speeds up and ensures greater stability of the blade assembly, while the Air Flow system allows constant air exchange and maximum breathability for the foot
- The combination of microfibre and high-tech fabric ensures stability, strength, lightness and breathability without neglecting the particularly attractive design
- Maximum comfort thanks to the anatomical profile, the ultra-padded collar and the special 3D lining (which also maintains the right foot temperature and prevents bacteria from forming) and the possibility of achieving perfect customisation via thermoforming
- Excellent support thanks to lateral reinforcements (65)

Those indicated below are indicative measures, we always recommend you to try the boots first. If your width is between two numbers in the table above, we recommend you to choose the smaller one (eg: if your foot width is 19,6 cm, consider 19,55 cm). Remember to wear socks when you measure your foot. The measurements are based on Mk and John Wilson blades length. Leather soles are handmade, length might vary of few millimeters, for this reason we advice to double check sole-blade combination before mounting it.
